New Media Design (Faculty: IT Integrated Design)

Q.No	Question
1	Think about **"Haptic Communication"**. Different vibrations can communicate different meanings (e.g., a short buzz for a notification, a long pulse for a warning). Design two distinct haptic feedback patterns that convey different information. Explain their use cases.
2	A**Kinetic Mobile** is an art installation where multiple components are balanced and designed to move freely in response to air currents, is interactive and motion is a key element. With the materials given, design a Kinetic Mobile installation. **Material Required:** • 10 straws • Tape • 3 sketch pens (red, blue, green) • Thick thread bundle • 2 needles • A3 sheet card paper
3	**Sketch and describe** a future newspaper or news experience that adapts to AI, AR, and immersive tech. How will users receive and interact with news? What format will it take?
