Transportation & Automobile Design (Faculty: Industrial Design)

Q.No	Question
1	Use the given materials to construct a working or conceptual model of a futuristic steering system that eliminates the traditional steering wheel. Sketch with labels to explain your design. **Material Required:** • Cardboard sheets • Straws, Paper clips • Rubber bands • Glue • Scissors • Small wooden sticks
2	Conceptualize an **award function** to recognize achievements in the field of "transportation / automobiles". Imagine a theme and goals for the awards. Design a poster for the awards on the theme. Generate a list of 10 ten categories for distributing awards.
3	**Watch this video** only once. Based on memory, find 2 transportation related problems you can identify in the scene. Evolve a solution for one of them and present using sketches and notes.
