Universal Design (Faculty: Industrial Design)

Q.No	**Question** Design a **medicine pill box** for a person suffering from
1	arthritis in their hands and fingers. They should be able to open, pick a pill and close the box with ease. Present through sketches & notes.
2	**Old people** face common issues while going to the bathroom. Write 3 instances of those and do a design intervention in detail for one. Present through sketches and notes. **Required Material:** ● Sketchbook or Digital Drawing Tablet ● Pens, Pencils, and Markers
3	**Redesign the dashboard** of a car for people with visual impairments. Consider tactile, voice-assisted, and intuitive design elements. Present your solution through sketches and annotations.
